

Simultaneous Guide-Electrode Combination Preclinical Component Specification

- Stainless steel hollow tube with two individually insulated wire electrodes attached to the side of the tube topped with a plastic pedestal
- Guides Internal/Injector Cannula to injection site and delivers electrodes to predetermined depth for simultaneous infusion and stimulation/recording
- Pedestal Height : 8 mm (.315")
- Pedestal Diameter: 3.5 mm (.138")
- Insulated Electrode Wire Diameter: 0.23 mm (.009")
- Available with any guide or electrode
- Autoclave up to 270°F
